

NREMT Test Preparation Program

MIEMSS is encouraging EMS Education Programs to host a NREMT Test Preparation Program for students that were enrolled in, and successfully completed, an EMT course between August 2014 and September 2015. For these students that are also affiliated with a Maryland EMS Operational Program the course will be free of charge. Additionally, for students that successfully complete an approved NREMT Test Preparation Program, MIEMSS will pay for an additional NREMT EMT Cognitive Examination attempt.

The following agencies have committed to providing a test prep course in their area. Please contact the agency directly for program information.
