

Automated External Defibrillators

Required AED Equipment Checklist

The following equipment should be kept with the AED at all times:

- 2 sets of defibrillator chest pads (electrodes)
- Optional - pediatric electrodes in addition to adult electrodes for locations serving children under 8 years of age.
- Disposable Gloves
- 1 extra battery set, if the AED uses replaceable batteries other than long life lithium battery
- Cables (if your AED has removable cables)
- The QR Code to the Public Access AED Use

Public Access AED Use Report Form

The Public Access AED Use Report Form must be completed within 48 hours of any event in which pads or electrodes are applied to a person, even if no shocks are delivered.

Please keep this QR code with the AED device for easy access to the electronic form.
