

# Maryland Institute for Emergency Medical Services Systems eMEDS® Validation of Date/Time for Hospital Alert Activation

Monday, July 31, 2023

On Thursday, July 13, 2023, the validation of the Date/Time of Hospital Activation/Alert grid was recommended by the EMSOPs present at the eMEDS® Statewide Steering Committee. This documentation allows clinicians to enter the date/time a receiving facility was alerted for a patient who meets STEMI, Sepsis, Stroke, and/or Trauma criteria.

**Hospital Team Activations/Alerts**

**+ Add**

Date/Time of Alert or Activation: [ ] [ ] [Clock] [Reset]

Pre-Arrival Alert or Activation:

- Cardiac Arrest
- Sepsis
- STEMI
- Stroke
- Trauma, Adult
- Trauma, Hand and/or Eye
- Trauma, Pediatric

If an activation/alert was not completed, clinicians will use the [Reset] button and select “Not Recorded/Not Done” as shown below. Note: Any hospital notification or medical consultation per protocol would qualify as meeting this requirement for specialty care patients.

**Hospital Team Activations/Alerts**

**+ Add**

Date/Time of Alert or Activation: *Not Recorded/Not Done* [ ] [Clock] [Reset]

Pre-Arrival Alert or Activation:

- Stroke

Validation Rule in Effect: Tuesday, August 1, 2023

Maryland System Validation Rule IDs: STEMI: 3325 / SEPSIS: 3326 / Stroke: 3327 / Trauma: 3328
